

AMENDMENTS TO THE CLAIMS:

Please amend claims 1 and 14-17, as shown below.

This listing of claims will replace all prior versions and listings of claims in the
Application:

Claim 1 (currently amended): A network commerce system comprising:

an orderer terminal ~~handled by~~ for interaction with an orderer ordering an item or
service;

a plurality of producing/processing terminals each ~~which is handled by~~ for interaction
with a producer/processor, said producer/processor producing and processing said item or
~~provides~~ providing a produced and processed item, in accordance with an order from said
orderer terminal;

wherein said orderer terminal and said producing/processing terminal are
interconnected via said network; and

a headquarters terminal including a receiver for receiving an order from said orderer
terminal transmitted via said network and a transmitter for transmitting the order received by
said receiver to a producing/processing terminal via said network;

said headquarters terminal selectively determining said producing/processing terminal
in accordance with a received order and then making the selected producing/processing
terminal produce and process said item or provide a produced and processed item.

Claim 2 (original): The network commerce system defined in Claim 1, wherein said
item or service is an item edited with digital data or editing of said digital data; and wherein
said orderer terminal transmits said digital data together with said order; and wherein each of

said producing/processing terminals receives said order and said digital data transmitted via said network and via said headquarters terminal and then edits said digital data in accordance with the content of said order.

Claim 3 (original): The network commerce system defined in Claim 2, wherein said digital data comprises image data or acoustic data.

Claim 4 (original): The network commerce system defined in Claim 2, further comprising a payment terminal connected to said network, for paying a purchase charge of said item sold or said service provided, via said orderer terminal.

Claim 5 (original): The network commerce system defined in Claim 2, wherein said item or said service is delivered or supplied to a destination other than said orderer.

Claim 6 (original): The network commerce system defined in Claim 3, further comprising a payment terminal connected to said network, for paying a purchase charge of said item sold or said service provided, via said orderer terminal.

Claim 7 (original): The network commerce system defined in Claim 3, wherein said item or said service is delivered or supplied to a destination other than said orderer.

Claim 8 (original): The network commerce system defined in Claim 1, wherein said digital data comprises image data or acoustic data.

Claim 9 (original): The network commerce system defined in Claim 8, further comprising a payment terminal connected to said network, for paying a purchase charge of said item sold or said service provided, via said orderer terminal.

Claim 10 (original): The network commerce system defined in Claim 9, wherein said item or said service is delivered or supplied to a destination other than said orderer.

Claim 11 (original): The network commerce system defined in Claim 1, further comprising a payment terminal connected to said network, for paying a purchase charge of said item sold or said service provided, via said orderer terminal.

Claim 12 (original): The network commerce system defined in Claim 11, wherein said item or said service is delivered or supplied to a destination other than said orderer.

Claim 13 (original): The network commerce system defined in Claim 1, wherein said item or said service is delivered or supplied to a destination other than said orderer.

Claim 14 (currently amended): A headquarters terminal comprising:

orderer terminals each ~~handled by~~ for interaction with an orderer ordering an item or service;

a plurality of producing/processing terminals each ~~which is handled by~~ for interaction with a producer/processor which produces and processes said item or supplies a produced/processed item, in accordance with an order from each of said orderer terminals; and
a headquarters terminal including:

a receiver for receiving an order transmitted from said orderer terminal via said network;

a transmitter for transmitting an item received by said receiving means to a producing/receiving terminal via said network; and

~~means~~ a determinator for selectively determining said producing/processing terminal in accordance with a received order and then making said producing/processing terminal produce and process said item or making said selected producing/processing terminal supply said produced/processed item;

wherein a network commerce is performed between said orderer terminal and said producing/processing terminal connected via a network.

Claim 15 (currently amended): A producing/processing terminal comprising:
orderer terminals each ~~handled by~~ for interaction with an orderer ordering an item or service;
a plurality of producing/processing terminals each ~~which is handled by~~ for interaction with a producer/processor which produces and processes said item or supplies a produced/processed item, in accordance with an order from each of said orderer terminals; and
a headquarters terminal including:
a receiver for receiving an order transmitted from an orderer terminal via said network;
a transmitter for transmitting an order received by said receiver to a producing/processing terminal via said network; and
~~means~~ a determinator for selectively determining said producing/processing terminal in accordance with a received order and then making said producing/processing terminal produce and process said item or supply said produced/processed item;
wherein a network commerce is performed between said orderer terminal and said producing/processing terminal connected via a network.

Claim 16 (currently amended): An orderer terminal used in a network commerce system, said network commerce system comprising:

orderer terminals each ~~handled by~~ for interaction with an orderer ordering an item or service;

a plurality of producing/processing terminals each ~~which is handled by~~ for interaction with a producer/processor which produces and processes said item or supplies a produced/processed item, in accordance with an order from each of said orderer terminals; and

a headquarters terminal including:

a receiver for receiving an order transmitted from an orderer terminal via said network;

a transmitter for transmitting an item received by said receiver to a producing/receiving terminal via said network; and

~~means~~ a determinator for selectively determining said producing/processing terminal in accordance with a received order and then making said selected producing/processing terminal produce and process said item or supply said produced/processed item;

wherein a network commerce is performed between a producing/processing terminal and said headquarters terminal connected via a network.

Claim 17 (currently amended): A payment terminal used in a network commerce system, said network commerce system comprising:

orderer terminals each ~~handled by~~ for interacting with an orderer ordering an item or service;

a plurality of producing/processing terminals each ~~which is handled by~~ for interacting
with a producer/processor which produces and processes said item or supplies a
produced/processed item, in accordance with an order from each of said orderer terminals; and

a headquarters terminal including:

a receiver for receiving an order transmitted from said orderer terminal
via said network;

a transmitter for transmitting an item received by said receiver to a
producing/receiving terminal via said network;

~~means~~ a determinator for selectively determining said
producing/processing terminal in accordance with a received order and then making
said selected producing/processing terminal produce and process said item or supply
said produced/processed item; and

a payment terminal for paying a purchase charge of said item or service sold or supplied
via said orderer terminal;

wherein a network commerce is performed between said orderer terminal and said
producing/processing terminal and said headquarters terminal, interconnected via a network.

Claim 18 (original): A network commerce method, wherein an orderer terminal orders
an item or service via a network and a producing/processing terminal sells said item or provides
said service, in accordance with said order, the method comprising the steps of:

receiving said order transmitted from said orderer terminal via said network, using a
headquarters terminal;

selectively determining a producing/processing terminal for said item in accordance with the content of said received order, using said headquarters terminal;

transmitting said order to said selected producing/processing terminal via said network;

making said selected producing/processing terminal produce and process said item or supply said produced/processed item; and

paying, when said order is received or after said produced/processed item is supplied, a purchase charge of said item or service via said orderer terminal.
